

# **Watershed Operations**

October 2009

#### Introduction

e Lower Clear Boggy Creek Watershed is located in Atoka, Bryan, Coal, and Johnston Counties. is watershed repair project will create or save jobs during the construction period. is project will make essential repairs to the damaged back slope of this dam.

# Lower Clear Boggy Creek Watershed

Lower Clear Boggy Creek Watershed Dam No. 38 is located in Bryan County, Oklahoma.

Funded through the American Recovery and Reinvestment Act (ARRA) of 2009, this project is part of the Obama Administration's plans to modernize the nation's infrastructure, jump-start the economy, and create jobs. NRCS is using Recovery Act dollars to update aging flood control structures, protect and maintain water supplies, improve water quality, reduce soil erosion, enhance fish and wildlife habitat. and restore wetlands. NRCS acquires easements and restores floodplains to safeguard lives and property in areas along streams and rivers that have experienced flooding.

## **Project Description**

- Location: Bryan County, 2nd Congressional District
- Federal Funding: \$50,000

is project will repair and stabilize the back slope failure of the dam by treating the displaced soil with gypsum and rock riprap.

#### **Partners**

- USDA, Natural Resources Conservation Service
- Bryan County Conservation District
- Oklahoma Conservation Commission

#### **Benefits**

is project will avoid more costly repairs in the future and prevent a dam failure. A dam failure would have catastrophic impact on water quality and downstream infrastructure. is project will ensure that \$10,682 in average annual flood damage reduction benefits will continue into the future.

Erosion, caused by shrink-swell tendencies of the soil, is evident below the inspectors standing on the back slope of this dam.
